1 SUMMARY

Computer Science undergraduate with strong problem-solving skills and solid foundations in Data Structures, Algorithms, DBMS, Operating Systems, and Object-Oriented Programming. Experienced in building scalable full-stack applications using the MERN stack and designing secure RESTful APIs. Passionate about writing optimized, maintainable code and solving real-world engineering problems.

2 TECHNICAL SKILLS

- **Languages:** Java, C++, C, JavaScript, SQL
- **Core Subjects:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP
- **Frontend:** React.js, Next.js, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, RESTful APIs
- **Database:** MongoDB, SQL
- **Tools & Technologies:** Git, GitHub, VS Code, IntelliJ IDEA, Postman

3 CODING PROFILE

- Solved 400+ Data Structures and Algorithms problems on LeetCode.
- Strong problem-solving skills in Arrays, Strings, Recursion, Trees, Graphs, Dynamic Programming, Greedy Algorithms.
- Regular practice of competitive programming and coding contests.

4 PROJECTS

KrishiSetu – Direct Farm Trading Platform 2026 *React.js, Node.js, Express.js, MongoDB, JWT*

- Developed a full-stack marketplace enabling farmers to directly sell products to nearby customers, reducing dependency on middlemen.
- Implemented location-based product discovery using MongoDB GeoJSON for efficient hyperlocal search and filtering.
- Built secure JWT-based authentication with role-based access control for farmers and customers.
- Designed scalable RESTful APIs for product management, cart handling, and order processing with optimized query performance.
- Improved user experience by building a responsive frontend using React.js and Tailwind CSS with efficient state management.

BlueCarbon Analytics – Coastal Carbon Monitoring Platform 2024
React.js, Node.js, SQL

- Built a data-driven platform to analyze and estimate blue carbon storage using structured datasets.
- Developed interactive dashboards for real-time visualization of environmental metrics.
- Designed scalable backend APIs and optimized database indexing for improved performance.
- Processed and structured large environmental datasets for analytical computations.

FoodCart – Full-Stack Food Ordering Platform 2024
React.js, Node.js, MongoDB

- Developed a full-stack food ordering system with secure JWT-based authentication and order management.
- Implemented role-based access control and RESTful APIs for efficient user and product handling.
- Designed optimized MongoDB schemas to ensure faster data retrieval.
- Improved application performance by refining API logic and reducing redundant queries.

5 ACHIEVEMENTS

- Qualified the National Defence Academy (NDA) examination twice and appeared for SSB interview.
- Cleared the Agniveer Air Force examination and completed physical screening.

- Runner-Up – Mera Nivaas Hackathon for innovative problem-solving and technical implementation.

6 EDUCATION

Maharana Institute of Professional Studies
B.Tech in Computer Science and Engineering

Jul 2023 – Jul 2027
CGPA: 8.67

Heritage International School
Intermediate (Class XII)

2022
80%

Heritage International School
High School (Class X)

2021
86%
